

OCEAN SIGNAL S100 SART

The SeaSafe S100 SART is designed to assist in the rescue and recovery of liferafts and survival craft.

When switched on, the SART remains in a standby mode until automatically activated by an X Band Radar sweep from any vessel in the vicinity.

The SafeSea S100 transmits a series of pulses which are displayed on the ships Radar as a line of dots, providing a bearing to the survival craft. The activation controls are identical to those on the SafeSea E100 EPIRB, making use by unskilled operators much easier.

Key features

- Superior battery life – even at -20°C
- User replaceable battery
- Non-hazardous battery
- Five year replacement interval
- Compact size for easy liferaft packing
- Supplied complete with telescopic pole and storage bracket
- Transport Canada approved
