

## Lifejacket light type Jack A-Alk (Automatic, Flashing light)

With a height of only 16mm this light can easily fit into any lifejacket without hampering movement of lifejacket material. This extremely visible LED light is an automatic water activated light with a manual on/off switch. The light can be equipped with two different types of clips to meet different requirements for attachment. Rounded edges ensure lifejacket integrity.

Light intensity is well above the 0,75cd approved standard.

Size: 85mm x 42mm x 16mm (LxWxH)

Height dome: 9mm

Weight: 67g

Material: polycarbonate

Waterproof

Battery: Alkaline, 5 years storage life

Operational life: minimum 8 hr.

Approvals: Solas MED 96/98/EC, USCG, TC, AMSA, RS

*It is the responsibility of the lifejacket producer to ensure correct attachment and positioning on the lifejacket. The light is maintenance free, but annually checks for apparent damage are recommended.*

*The light contains alkaline batteries. Do not recharge, incinerate or dismantle the light! Disposal of lights should be done in accordance to regulations.*
